- 15/30RYG and REYG
- 38/48RCL
- 40-150ERES Models (includes ERESB, ERESC, and ERES D)

Description

The battery heater kit includes a heating pad and battery wrap to help increase the battery temperature in cold climates. The battery heaters are connected to a thermostat for controlled heating. When temperatures fall below an acceptable level, the thermostat activates the battery heaters, maintaining optimum battery temperature.

Battery heater kits are recommended for generators installed in regions where the temperature regularly falls below 0° C (32° F).

Kit Contents

Models	14/20 kW 40-150 kW	8.5/12, 15/30, 17/18 kW	38/48 kW
